## Cybersecurity Awareness Training for Financial Institutions.

### About this training

The usage of digital channels in the banking industry such as internet banking, digital wallets, mobile and ATM banking has increased.

This increases their exposure to cyber-related attacks which may lead to financial and reputational losses. According to the Annual Crime Report 2018, a total of 198 cases were reported compared to 158 cases in 2017 which resulted into a monetary loss of Ugx 610m to cyber criminals in 2018 alone! Is your bank part of these statistics?

### Training Outcomes:

On completion of this training, you will be able to:

- You will learn how to prevent an attack, how to detect an attack and how to react to an attack appropriately.
- You will learn how to convey effective defense techniques without getting overly suspicious and being unhelpful to legitimate customers.
- You will learn how to balance trust with verification.

### Course Outline:

- Current Banking Cyber threats
- Cyber threat control and mitigation
- Threat simulation (Practical sessions)
- Core Banking Application Security
- Best practices for Financial Institutions.

### Learning Outcomes:

- How to build up your resilience to attacks and why this is more important than you currently think.
- Identify, mitigate and control threats to the organization.
- Determine which data is regulated and how to avoid accidental disclosure (basically data leaking).
- Secure your core banking application and prevent reputation damaging outages.

- Align your I.T with the best practices outlined by BoU.
- Ensure your staff have the knowledge and skills to handle the ever increasing cyber threats without exposing critical confidential information.

### Target Audience

- Information Systems administrators..
- Security Systems administrators.
- Information Technology officers.

### Requirements

- You should know how to use a computer.
- A basic understanding of operating systems, networks, and the Internet is helpful.
- You should be able to download documents and install software.

### Duration and Fee

**Duration:** : 28th June 2019

**Venue:** Institute of Forensics & ICT Security

**Fee:** USD \$150 per person at the Institute.

OR Custom in-house training at venue of your choice

**Fee:** Negotiable
